

MATÍAS FERNÁNDEZ

SENIOR FULL-STACK · APPLIED AI

Paraná, Entre Ríos, Argentina | fernandez.amatias@gmail.com
linkedin.com/in/fernandez-amatias | github.com/matiasaf

PROFILE

Senior Full-Stack Engineer with more than ten years of experience across frontend architecture, backend, cloud, distributed systems, and applied AI. Hands-on technical leadership with a strong focus on React, Next.js, TypeScript, and products that integrate models and retrieval systems responsibly.

EXPERIENCE

Argeniss Software

Senior Full-Stack Engineer

Feb 2022 — Present

Client: Amplity Health

- Lead the React/Next.js frontend of AI Studio while contributing hands-on across .NET, Azure Functions, Python document processing, Azure OpenAI, Pinecone, SignalR, Azure SQL, and Logic Apps. More than 1,000 documents have completed its processing pipeline.
- Co-develop Azure IC Portal using Next.js 15, React 19, strict TypeScript, Fluent UI, React Query, Prisma, Azure SQL, Zod, authenticated route-handler APIs, large-list virtualization, and asynchronous bulk workflows.
- Maintain and evolve a Website Chatbot spanning React/Vite, an embeddable widget, Python/FastAPI, PostgreSQL, Azure Functions, WebSockets, Azure OpenAI, Pinecone/RAG, Docker, and Azure Container Apps.
- Led the Amplity.com delivery team from Aug 2024 to Feb 2025, partnering with Product while remaining hands-on. Improved a Business Intelligence Tool dashboard load time by 35%.
- Define technical conventions, perform code reviews, and maintain architecture documentation.

Endava

Full-Stack Engineer

May 2021 — Feb 2022

Client: Bloomberg LP · Workpaper

- Participated in the beta launch and a React/Redux/TypeScript UI refactor, while contributing almost equally to Node.js services and PostgreSQL-backed APIs.
- Built generic TypeScript forms, optimistic updates, Playwright and React Testing Library coverage, plus serverless APIs with AWS Lambda, API Gateway, and DynamoDB.
- Mentored and reviewed code within a five-developer team as collaborative technical leadership.

Hexacta / GlobalLogic

Full-Stack Engineer

Jan 2019 — May 2021

TechInsights · BA147 · SUACI

- Helped migrate Java services to Node.js/TypeScript serverless services on AWS; the team migration reduced infrastructure costs by approximately 30%.
- Contributed to an Angular 7-to-12 migration, interactive analytics, Terraform infrastructure, blue-green deployments, Ionic offline synchronization, map integrations, and Java/Spring Boot services.

Government of Entre Ríos

Software Engineer

Nov 2016 — Jan 2019

Public-sector platforms

- Built regulated systems with PHP, Oracle, React, React Native, Laravel, and Vue, including RBAC, auditing, traceability, and compliance requirements.
- Automated ETL workflows with Node.js including validation, transformation, deduplication, alerts, and retries.

Genosha

Software Engineer

Jun 2016 — Dec 2016

Video-generation platform

- Viral-video workflow with AngularJS, Node.js, Docker, AWS ECS and FFmpeg; optimized 720p encoding.

STACK

Frontend: React 19 · Next.js 15 · TypeScript · React Query · Redux · Fluent UI · Angular · Vue · Ionic · React Native
Backend & APIs: Python · FastAPI · Node.js · .NET 8 · ASP.NET Core · Azure Functions · Java · Spring Boot · Zod
Applied AI: Azure OpenAI · RAG · Pinecone · Embeddings · Document processing · Source attribution · Feedback loops · Usage & cost monitoring
Cloud & Data: Azure · AWS · Docker · Terraform · Bicep · PostgreSQL · Azure SQL · DynamoDB · CI/CD
Quality: Playwright · React Testing Library · Cypress · Vitest · xUnit · Web Vitals

EDUCATION

Analyst in Applied Informatics

Universidad Nacional del Litoral · 2008–2017

LANGUAGES

Spanish — Native

English — B2, advanced professional communication
